

SAFETY is our utmost concern for the community. LET'S STAY SAFE TOGETHER.

PEARBLOSSOM HIGHWAY REBUILD PROJECT

CONSTRUCTION ZONE SAFETY

CLOSED ROADS in the project area are under construction and unsafe for public use. Construction workers, as well as their vehicles and equipment, may be present on the closed roads at any time of the day. For your safety and theirs, please stay out of the construction zone.

TRAFFIC CONTROL DEVICES & PUBLIC SAFETY

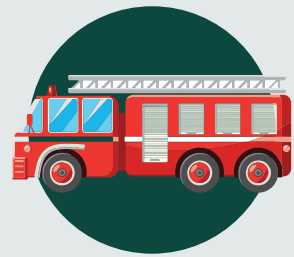

YOUR SAFETY MATTERS. Traffic control devices, such as cones, signs, and message boards, are selected and carefully placed to provide safety and guidance for all users of the road. The position and condition of the devices are very important!

Please do not move, run over, or otherwise tamper with these important traffic control devices. Let's all make sure these are left in place to help protect and guide all users of the roads.

DEDICATED ACCESS ROUTES FOR EMERGENCY SERVICES

Access routes for use by emergency vehicles have been set up in the project area, as marked by emergency use \access only signs. These routes are not for public use and must remain clear and open for emergency vehicles to use at any time without delay.

Please do not drive on the emergency access routes – seconds are precious in emergency response and you can help save a life!

Be Advised: Local law enforcement will be on site to enforce unauthorized entry to the construction zone and unauthorized use of emergency routes.

BE READY
AND
BE INFORMED!!
